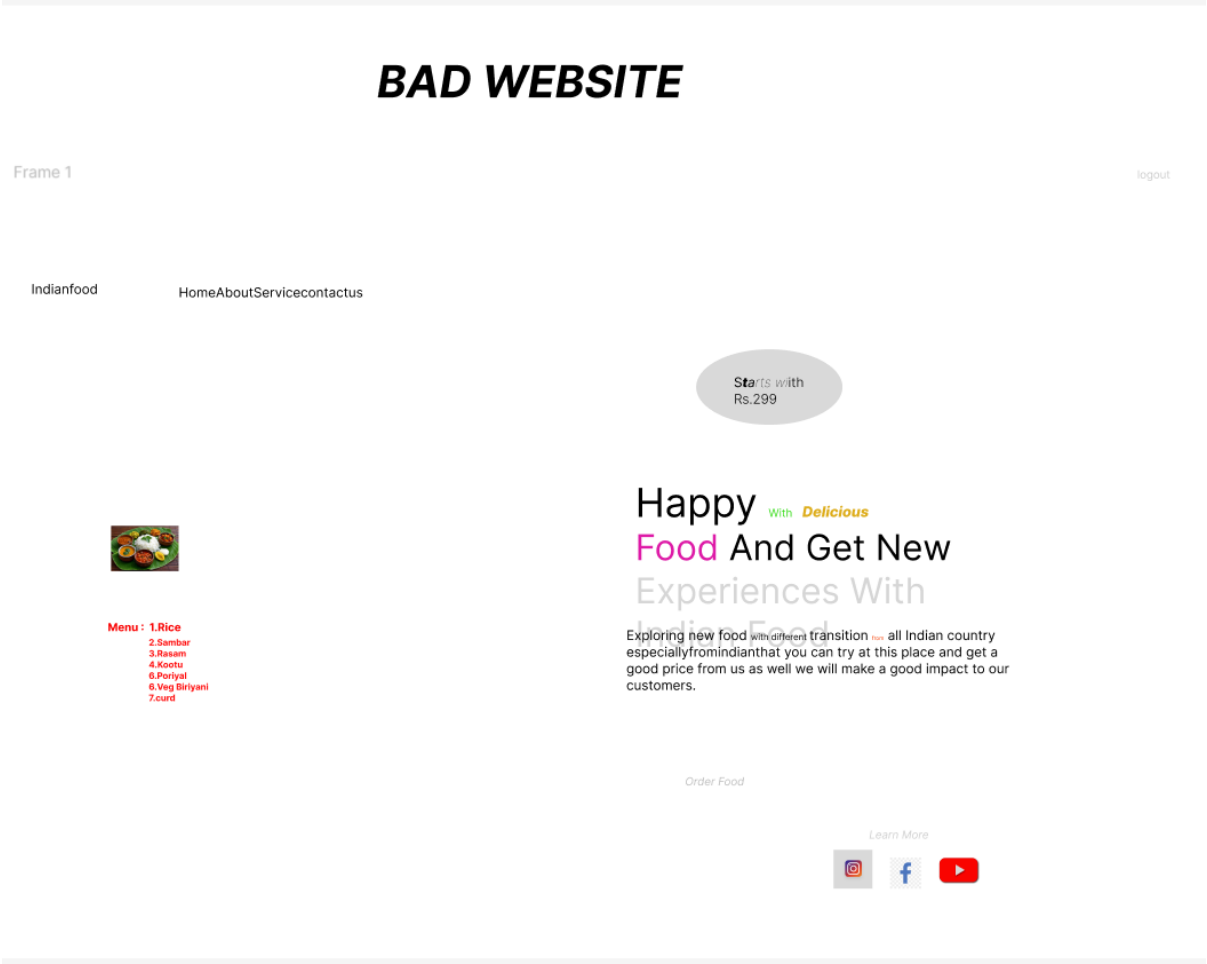
USER INTERFACE AND DESIGN

COMAPARSION OF UI DESIGN BETWEEN TWO FIGMA CREATION

BAD WEBSITE :



GOOD WEBSITE :

BAD WEBSITE (Indian Food Site)

1. Design Style:

- Layout looks empty and unbalanced.
- Too much blank space content is not aligned properly.
- Colors feel dull and inconsistent making the design look unfinished.

2. Content:

- Text is hard to read due to small size and poor spacing.
- Food image is too small and not visually attractive.
- Menu list looks crowded and poorly formatted.

3. Navigation:

- Menu items (Home About Service Contact) are too close together.
- Navigation bar looks plain and unclear.

4. Purpose:

- Fails to attract users or encourage ordering due to weak presentation.

GOOD WEBSITE (2nd Photo – Improved Indian Food Site)

1. Design Style:

- Clean, modern, and balanced layout.
- Uses attractive colors (red, yellow, white) that match food theme.
- Food image is large, clear, and visually appealing.

2. Content:

- Headline is bold and easy to read.
- Description text is clear and well-spaced.
- Menu is placed in a highlighted box, making it stand out.

3. Navigation:

- Navigation bar is well-spaced and readable.
- Login and buttons (Order Food, Learn More) are clearly visible.

4. Purpose:

- Encourages users to explore food, order, and engage with the website

Key Differences (Short Summary)

Feature	Bad Website	Good Website
Layout	Unbalanced	Well-structured
Colors	Dull & unclear	Bright & attractive
Images	Small & weak	Large & appealing
Navigation	Confusing	Clear & organized
User Experience	Poor	Smooth & engaging
